

MatClass Extension Option for Professional Data Maintenance

On purchasing an AmpereSoft TemperatureCalculator Professional license you will receive an activation code for the full range of functions in the TemperatureCalculator calculation software as well as an application-based activation of the MatClass database software with a corresponding range of functions.

This enables you to adapt the full range of MatClass functions to your particular data maintenance requirements with the purchase of a higher MatClass license.

Here is a brief overview of the most important functional differences.

AmpereSoft TemperatureCalculator with MatClass variant	MatClass Temperature Calculator	MatClass Professional	MatClass Data Management	AddOn MatClass Data Management Advanced
