

QuotationAssistant ...

... helps you to prepare quotations and tenders adjusted to the requirements of the electrical industry.

Easy
handling
using drag & drop

Flexible
surcharges & discounts on
wages and material costs

Standardized
data base

Structured
bill of quantities
& GAEB files

Create offers
quickly &
efficiently

Quotation

direct material cost
+ direct wage cost
+ share of wage cost
= production cost
+ indirect cost and supplements
+ material surcharges
= Total

Offer Nr. 4711

Pos. 1

incl. metal surcharges
and installation costs

We power your engineering & processes.

Your requirements

Simple and flexible preparation of quotations and tenders.

Consideration of **labor costs, metal surcharges and cost factors** in calculations.

Our solution:

QuotationAssistant

- **QuotationAssistant** helps you to prepare quotations and tenders adjusted to the requirements of the electrical industry.
- **Comprehensive functions** allow the **quick preparing of simple quotations** up to the calculation of extensive tenders.
- Use the helpful import function for GAEB files to treat **public tenders**.
The formats X81, X82, X83, P81, P82, P83, D81, D82, D83 can be imported.
After finalizing your quotation, simply export to **GAEB format X84, P84 or D84**.
- As well as the direct material costs, QuotationAssistant considers **direct wage costs and share of wage cost as well as indirect costs** and surcharges including **material surcharges**.
- In addition to the output of the quotations and calculations it's possible **to export sum and single part lists**.
Thus, in case of order, the transfer of material data from your quotation **to your CAE system for detailed engineering** can be done without much effort.
